

Top Tips for Revision in VCERT Engineering

- Revise little and often.
- When revising refer back to all the practical work that you have done.
- Use the workbook to make notes and write any questions that you need to ask your teacher.
- Place greater emphasis on revising what you don't know/or areas of weakness.

Key Revision Techniques

- Work your way through the revision guide that we have written for you.
- Work your way through the work book.
- Practice the past papers that are available online.
- Breakdown the extended writing questions into individual sections.
- Make sure you know what each of the command words are asking you to do i.e. Explain, describe, evaluate, discuss etc.
- Create your own flash cards.
- Practice a past paper and time yourself to ensure that you can complete it within the time limit.

Revision Sessions

- Revision is done in class and for home learning.
